Role Overview (Manager):	Maintains multiple benches while consistently meeting or beating the 20-day turn time goals of the Repair Station.
Role Overview Rating (Individual):	Outstanding
Role Overview Rating (Manager):	Outstanding

Achievements and Constraints

Achievements (Individual):	Extremely high work output with little or no sacrifice in quality and reliability, eagerness to work with others to resolve issues, perfect attendence since start date, ability to work just as hard without supervision as with supervision, primary focus on the success of the company.
Achievements (Manager):	Was a real team player and valuable asset in the solution regarding the DF-431B test procedure issues.
Constraints (Individual):	Constant heavy workload due to the advent of NAT products and critical turn times, not leaving quite enough time for needed changes and improvements to increase efficiently. However, there is always a way to find (or make) the time once I am more used to it. I can say in all honesty that I very much enjoy the challenges and pressures.
Constraints (Manager):	Barry cheerfully accepted the challenges knowing that there would be steep hill to climb. He excelled under these conditions.
